## **TECHNOLOGY AND LIVELIHOOD EDUCATION TEACHER'S GUIDE**

Weed control is essential for obtaining good yield or production in onion farming, if not, then it may lead to damage in onion bulbs. About 3 manual hoeing with weeding is enough for controlling weeds in the crop. Earthing up of poor plants is also essential after 3 to 4 irrigations along with mulching.

## **Onion Farming Production Guide & Information for Beginners ...**

a crop depend on the type of crop and growth stage, field soil characteristics, irrigation system type and capacity. Different crops vary in growth characteristics that result in different relative water use rates. Soils differ in texture and hydraulic characteristics such as available water-holding capacity (AWHC) and capillary movement.
