The GM Ecotec engine, also known by its codename L850, is a family of all-aluminium inline-four engines, displacing between 1.4 and 2.5 litres. While these engines were based on the GM Family II engine, the architecture was substantially re-engineered for the new Ecotec application produced since 2000. This engine family replaced the GM Family II engine, the GM 122 engine, the

The 2,2 Speedster has an oil cooler fitted, connected to the top of the oil filter. That is not an ideal solution and therefore I modded the LSJ adapterplate so it now uses only the cooler return through that. The oil cooler feed is coming directly from the block's oil gally, like the Z22SE has in a Speedster.

In most cases, manuals will give you the oil pan capacity, then tell you to add one quart if the car has a filter. Next, start the engine. Inspect for leaks around the oil filter or the drain plug. Check to make sure that the oil pressure monitor light stops glowing or that the oil pressure gauge indicates normal pressure within 5-10 seconds.
