## **Genetic algorithm - Wikipedia**

The need for the development of more efficient search optimization techniques led to the design of heuristics and metaheuristic algorithms. Two important features for metaheuristic algorithm are their abilities to make use of global search mechanism and local mechanism in course of a search.

natural selection and natural genetics.

Unlike classical search and optimization methods, GA starts its search with a random set of solutions, instead of a single solution. Each solution is then evaluated and assigned a fitness value.

## Acces PDF Genetic Algorithms In Search Optimization And

Machine Learning David  
Edward Goldberg

The genetic algorithm is a random-based classical evolutionary algorithm. By random here we mean that in order to find a solution using the GA, random changes applied to the current solutions to generate new ones. Note that GA may be called Simple GA (SGA) due to its simplicity compared to other EAs. GA is based on Darwin's theory of evolution.
